Community Surveys

- 429 Surveys in four ethnic/racial minority communities
 - Hispanic/Latino
 - Asian Pacific Islander
 - African American
 - Native American
- 241 Surveys with Community Partners/Health Professionals
- 303 Surveys with MCDPH Staff

Recommendations are prioritized based on the following criteria

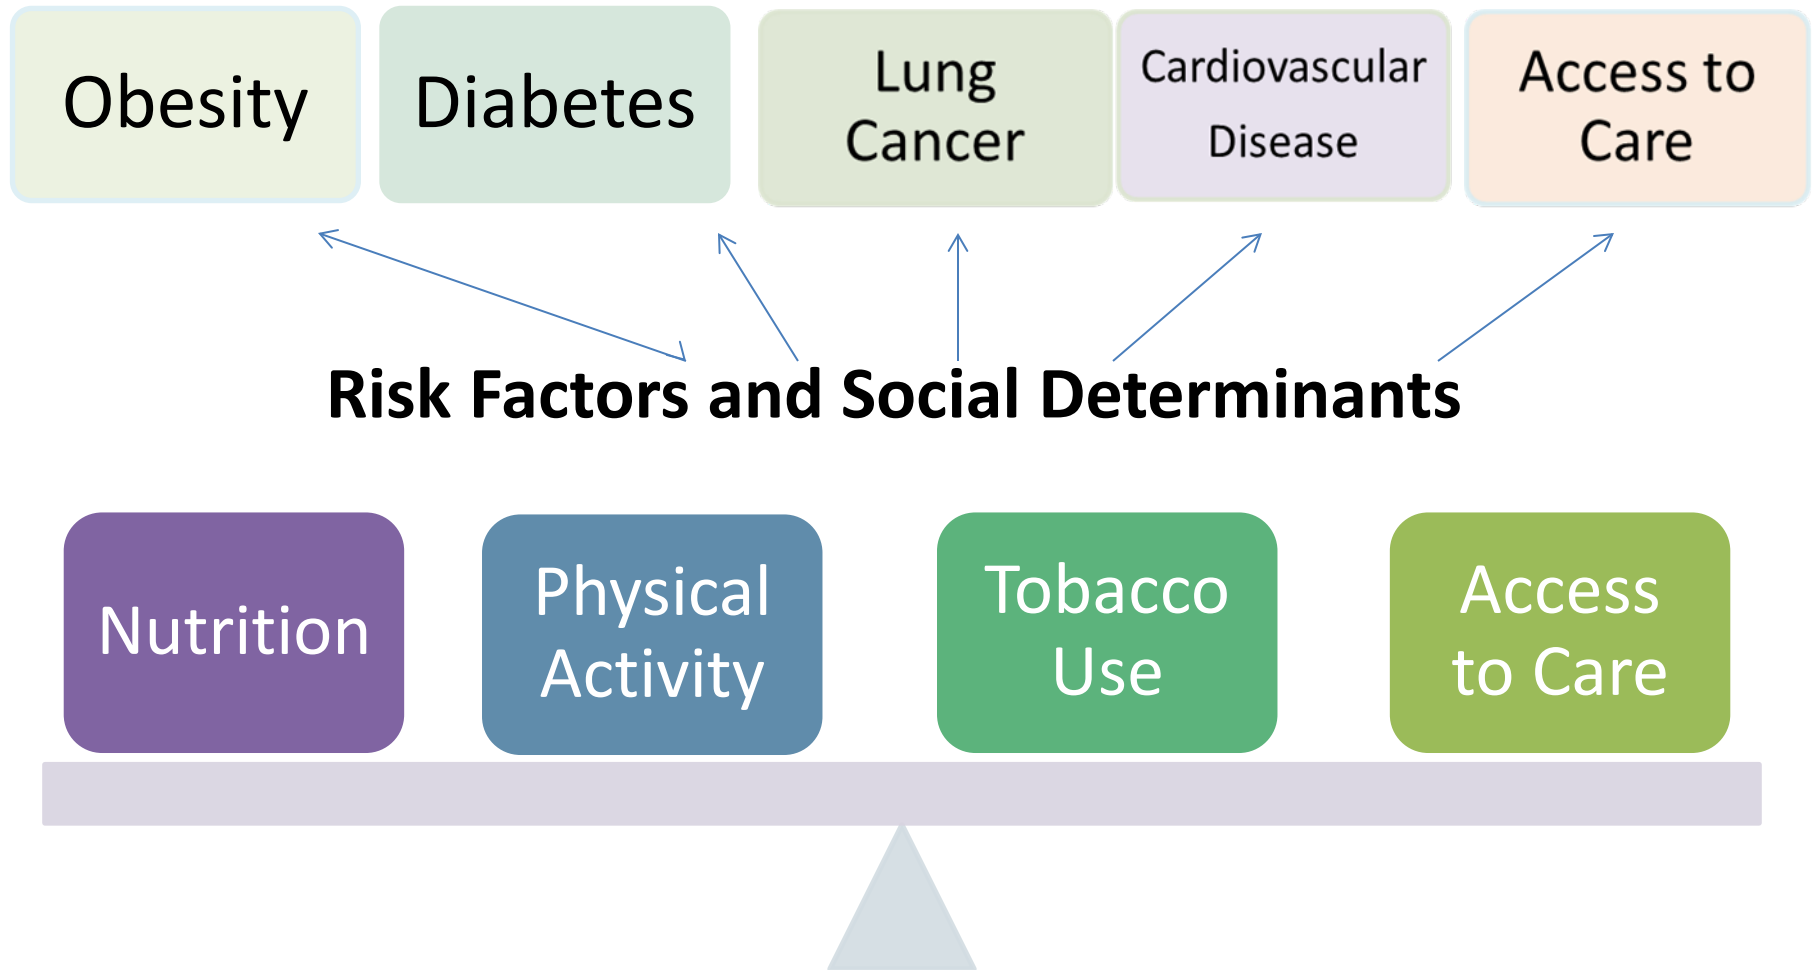

- The top three most important issues identified by the community
- Conditions that were responsible for the highest number of years of potential life lost (YPLL); inpatient hospital days; and emergency room visits
- Prevalence and trends over a 10 year period from 2001 through 2010
- Existence of health disparities by race/ethnic subgroups

Focus Groups

202 Community Members Participated

- 4 Focus groups African American population
- 4 Focus groups Asian Americans
- 4 Focus groups Native Americans
- 4 Focus groups Hispanic/Latino
- 2 Focus groups Lesbian, Gay, Bisexual, Transgender
- 2 Focus groups Senior citizens
- 2 Focus groups low income residents

Strategic Public Health Priorities

Community Health Improvement Planning (CHIP)

- Based on the CHA priority health concerns
- Evidence-based
- Focus on policy, systems, and environmental approaches
- CDC Domains
 - Epi/Environment/Health Systems/Co.- Clinical Linkages
- ADHS CD Framework
 - Where we live, work, learn, seek care
- Integrate within MCDPH structure and “CLOUD” workgroups
