

# Planning & Development Department

## COMPLIANCE INSPECTION FOR FINAL ACKNOWLEDGEMENT

- ✓ A Compliance Inspection is a development permit authorizing a **one-time inspection** to verify the site is in conformance with the original approved plan set. A copy of the approved plans must be onsite for the inspector. This inspection does **NOT** authorize work to be performed.
- ✓ A Compliance Inspection is only applicable if the permit had previously been ISSUED **and** all inspections were passed EXCEPT the Final Drainage and/or Final Building Inspection.
- ✓ If construction was not in accordance to the original plan set, the result will be a failed inspection. The next step will be to apply for a new permit. Current codes, regulations, fees and standards will apply.
- ✓ If additional unpermitted activity is evident on the site, the result may be a failed inspection. Re-Inspections are **NOT** an option under this type of permit.
- ✓ Often projects require both a Final Drainage and a Final Building inspection. The Final Drainage inspection (#970) must be passed prior to receiving a Compliance Inspection for Final Building (#900). If the Final Drainage inspection fails, the project may require a Residential Alteration For Final (RAFF) permit.
- ✓ The fee for a Compliance Inspection is \$100 with a \$10 Addressing verification fee.

PERMIT TRACKING #(s): \_\_\_\_\_

I, (print / type name) \_\_\_\_\_, the  owner or  authorized agent of the listed permit(s), agree to pay all fees for services rendered and that construction was in accordance with the approved plan set, which will be onsite for the inspector to review.
