

PERMIT APPLICATION PROCESS NOTICE New Transient Non-Community Public Water System

According to the Safe Drinking Water Act, any water system that supplies more than 25 people or 15 service connections per day for at least 60 days per year is classified as a public water system. A business, for example a restaurant or motel, that serves an average of at least 25 people per day but does not serve the same people for more than six months of the year would be categorized as a *transient non-community water system (TNCWS)*. For complete requirements for public water systems, please refer to Arizona Administrative Code Title 18, Chapter 4. Copies are available from the office of the Arizona Secretary of State or online at www.azsos.gov. The following major requirements must be complete prior to the issuance of a new TNCWS permit:

- 1. New Source Approval.** New Source Approval is required for both groundwater and surface water sources. To obtain New Source Approval, the new TNCWS permit applicant must submit a New Source Approval application, which includes a chemical analysis of all regulated contaminants in the source water; a copy of the Department of Water Resources registration; and for a well, a well driller's log and the scheduled New Source Approval application review fee of **\$425**.
- 2. Engineering Approval.** Arizona law requires water system components, including wells, treatment plants, storage and pressure tanks, distribution mains, and booster pumps, to obtain approvals to construct and approvals of construction. The system must complete these applications and submit plans sealed by a Professional Engineer with required scheduled review fees. Please contact Cindy Furze at (602) 506-1058 for more information on engineering requirements.
- 3. Certified Operator.** All public water systems must obtain the services of a certified water operator. Operators monitor the water for various contaminants throughout the year, including bacteria, nitrate, nitrite, lead, and copper. A certified operator must inspect each well site a minimum of once per month. An employee or associate of the system may wish to become certified, you may contact ADEQ Operator Certification Program at (602) 771-0100, azopcert@azdeq.gov or refer to the ADEQ web site www.azdeq.gov for more information on operator certification.
- 4. Operating Permit Issuance.** After new TNCWS receives applicable approvals listed in requirements 1-3 above, the applicant will be sent a Maricopa County public water system permit application and associated invoice. Once the signed public water system permit application and appropriate scheduled annual permit fee is received by the department, the operating permit will be issued to the permit owner/holder.

The Department will approve or deny this application in 83 business days (16 day - Administrative Review, 67 day - Substantive Review) excluding any days the application is returned to the applicant for additional information. You may request a clarification from the Department of its interpretation or application of a statute, ordinance, regulation, delegation agreement or authorized substantive policy statement as provided in A.R.S. §11-1609. Contact us by e-mail, regular mail, telephone, or in person at the address listed at the top of the page, marked attention Drinking Water Program (DWP). The DWP Application Clerk is the contact for information regarding this application and can be reached at (602)506-6935 or sdwquestions@maricopa.gov with any questions. Additional application information may also be found on our program website at <http://www.maricopa.gov/2350/Drinking-Water>.

APPLICATION FOR NEW TRANSIENT NON-COMMUNITY PUBLIC WATER SYSTEM PERMIT

All fields are required to be completed. Incomplete applications will not be accepted.

Please Note: According to the Safe Drinking Water Act (SDWA), any water system that supplies more than 25 people or 15 service connections per day for at least 60 days per year is classified as a public water system. A non-transient non-community water system (TNCWS) is defined as a system that does not regularly serve at least 25 of the same persons over six months per year. This application must be completed by the proposed public water system permit owner/holder or authorized representative of the proposed public water system*.
