

Make Your Own Particle Pollution Collector!

Cut a collector from the pattern.

Cut a window in the middle of the collector.

Cover the back of the window with a white sticker.

The sticky side will face up and out.

Hint: Don't touch the sticky part!

Punch a hole at the top of the collector.

Tie a piece of string or ribbon through the hole at the top.

Choose a location and hang up your collector.

Wait a few days. Take your collector down. Inspect it with a magnifier. What do you observe? What's in YOUR air?
